

Remove and installing chain

Video link: <https://www.youtube.com/watch?v=zD5KW3tjKPg>

Source video: Remove and installing chain by Stark Future Official

Applicable models: MX

Scope

This guide follows the original Stark Future video overlay sequence for the procedure shown in the original MX tutorial video. Each step below is aligned to the instruction text shown on screen.

Preparation

- Place the bike on a stable stand or work area before starting the procedure.
- Prepare the correct tools for the fasteners, clips, brackets, and components shown in the video.
- Keep removed hardware organized in sequence so reassembly follows the same order as the video.
- Follow the torque values shown in the original Stark tutorial video wherever the video displays a torque on screen.

Removal Procedure

1. Remove chain link

Remove chain link.

Installation Procedure

2. Run the chain through the front sprocket

Run the chain through the front sprocket.

3. Run the chain through the front sprocket

Run the chain through the front sprocket.

4. Install chain

Install chain.

Critical Checks Before Riding

- Confirm the serviced components are fully seated and all fasteners are tightened in the correct order.
- Recheck all torque-critical hardware before riding.
- Make sure all routed cables, clips, brackets, and surrounding parts are returned to their original positions.
- Inspect the bike visually for any missing hardware before returning it to service.
